PAGE 1

Q1: Where do you normally get your news about technology?

On the internet using websites

Q2: What particular technology areas/topics interest you?

Computer chips, Operating system software, all of it really.

Q3: What is your initial impression of our website and in particular the landing page?

Horrible. needs to updated alot.

Q4: What do you think about the screen layout? In particular how did you find the location of the tweets?

Respondent skipped this question

Q5: Do you feel that the news articles were relevent to you? if no they what could be changed?

No, its all iOS related stuff

Q6: Did you find the tweets under each article interesting or useful?

Needs to be looked at also. center the the posts, or put something on the right side. its even as you long at it

Q7: Do you feel the website is something you would use in the future? if no then what could be changed?

Yes

Q8: what did you like most about the website?

The bold headers make it quick and easy to read and skim through the page . also the links are handy

Q9: what did you like least about the website?

The layout and the look.

Q10: how do you think it could be improved?

Get a designer to look at it, or a fresh pair of eyes

PAGE 1

Q1: Where do you normally get your news about technology?

bbc, hacker news, reddit

Q2: What particular technology areas/topics interest you?

reverse engineering, innovation, nano materials, quantum computing, electronics, hacking, web technologies, semantics,

Q3: What is your initial impression of our website and in particular the landing page?

very plain and too much whitespace. difficult to make out clear headlines on which to click. sounds facile but needs more pictures or less whitespace

Q4: What do you think about the screen layout? In particular how did you find the location of the tweets?

Respondent skipped this question

Q5: Do you feel that the news articles were relevent to you? if no they what could be changed?

less apple related news

Q6: Did you find the tweets under each article interesting or useful?

very plain and too much whitespace. difficult to make out clear headlines on which to click

Q7: Do you feel the website is something you would use in the future? if no then what could be changed?

if improvements were made and it was a cross between hacker news and flipboard then yes

Q8: what did you like most about the website?
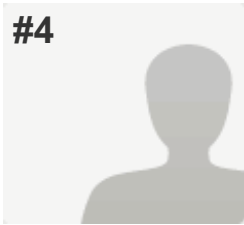

that its focused soley on tech

Q9: what did you like least about the website?

the volume of apple related stories

Q10: how do you think it could be improved?

obvious from comments above

PAGE 1

Q1: Where do you normally get your news about technology?

flipborard app

Q2: What particular technology areas/topics interest you?

new technology gadgets, advances in chip technology, spacex technology advances.

Q3: What is your initial impression of our website and in particular the landing page?

very basic. could do with some graphics. Not alot of info there. It says that it can be tuned to users technology interests but no option to select interests unless logged in. Only allows you to log in if you have a twitter account so limited to twitter users only. Idea is similar to flipbard app or is a technology version of storyful.com.

Q4: What do you think about the screen layout? In particular how did you find the location of the tweets?

Respondent skipped this question

Q5: Do you feel that the news articles were relevent to you? if no they what could be changed?

some were

Q6: Did you find the tweets under each article interesting or useful?

basic - not at all attractive to look at.

Q7: Do you feel the website is something you would use in the future? if no then what could be changed?

has potential - possibly include a demo video showing possibilities before having to create an account.

**Q8: what did you like most about the website?**

the idea

Q9: what did you like least about the website?

looks like a student project

Q10: **how do you think it could be improved?**

Better graphics. More options to select technology interest. Alow to select interests without having to log in. Check out flipboard app for how it follows your twitter friends tweets that has many up to date technology comments included in general technology news stories

PAGE 1

Q1: **Where do you normally get your news about technology?**

various inductry websites and oneline training for new technologies

Q2: **What particular technology areas/topics interest you?**

web dev, jboss, ci, security, networks

Q3: **What is your initial impression of our website and in particular the landing page?**

too much white space around each article - seems to be a pre-first login or pre-first browse issue. Once I
clicked on an article proper layout was used - grey line between each article and text for each was centred.
perhaps also add a thumbnail for each article where possible
B&W only?

Q4: **What do you think about the screen layout? In particular how did you find the location of the tweets?**   *Respondent skipped this question*

Q5: **Do you feel that the news articles were relevent to you? if no they what could be changed?**   no - initial ilsting pre login was al apple OS related

Q6: **Did you find the tweets under each article interesting or useful?**

bland
consider tiles for each areas - Apple OS in Quadrant 1, Android in Quadrant 2, etc.

Q7: **Do you feel the website is something you would use in the future? if no then what could be changed?**   no - cannot login as do not have a twitter a/c

Q8: **what did you like most about the website?**   *Respondent skipped this question*

Q9: **what did you like least about the website?**

login restriction
content very limited

Q10: **how do you think it could be improved?**   see 9

PAGE 1

Q1: Where do you normally get your news about technology?

Newspapers online

Q2: What particular technology areas/topics interest you?

Re use of public sector information, data protection

Q3: What is your initial impression of our website and in particular the landing page?

Lacks colour and fornat variety. Perhaps too much text being presented - headlines without synopsis

Q4: What do you think about the screen layout? In particular how did you find the location of the tweets?	*Respondent skipped this question*
Q5: Do you feel that the news articles were relevent to you? if no they what could be changed?	*Respondent skipped this question*

PAGE 1

Q1: Where do you normally get your news about technology?

From Vendors account managers, through emails, computer weekly etc.

Q2: What particular technology areas/topics interest you?

Windows desktop, windows server, unix, virtualisation, vmware, hyperv, citrix, system z, emc storage, network, antivirus, security

Q3: What is your initial impression of our website and in particular the landing page?

it doesn't jump out at you that its about Technology - I think your header needs to be bolder. Not sure the grey writing on black background works - and writing is too small.   Other than that the concept of the website is good.

Q4: What do you think about the screen layout? In particular how did you find the location of the tweets?	*Respondent skipped this question*

Q5: Do you feel that the news articles were relevent to you? if no they what could be changed?	Somewhat - am not a real technogeek but they were relevant to the topics I chose

Q6: Did you find the tweets under each article interesting or useful?

I like the screen layout and found myself more drawn to the latest news. I think its a good combination. I know that

Q7: Do you feel the website is something you would use in the future? if no then what could be changed?	Possibly - I think you would need a bigger range of sources

Q8: what did you like most about the website?

I like the latest news stuff - not tailored to what I want but actually some of the articles there are more interesting
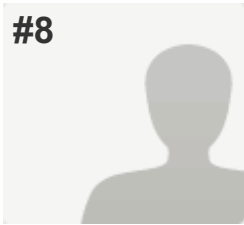

Q9: what did you like least about the website?

the pop ups aren't great - possibly this is just beta problems - will send an email with specifics..

Q10: how do you think it could be improved?	If you could just link into the actual article rather than popping up?

PAGE 1

Q1: Where do you normally get your news about technology?

From websites like engadget.com,techcrunch.com.

also use the feedly app to get the RSS feeds from the tech websites.

Q2: What particular technology areas/topics interest you?

Telecom ,new gadgets,fashion.

Q3: What is your initial impression of our website and in particular the landing page?

Looks quiet user friendly,Liked the seggregation of the Latest News and the news of our interesting topics.

Would have been great if there was an option to login through google account as well.

Q4: What do you think about the screen layout? In particular how did you find the location of the tweets?	*Respondent skipped this question*

Q5: Do you feel that the news articles were relevent to you? if no they what could be changed?	They were relevant and were according to the interests chosen.

Q6: Did you find the tweets under each article interesting or useful?

Screen Layout is interesting ,topics with a picture or video would be more attractive.

Would prefer the Your Interesting list to be in the middle and the sponsor list on the left.

Just a view :)

Q7: Do you feel the website is something you would use in the future? if no then what could be changed?	I would really like to add it to my daily watch list

Q8: what did you like most about the website?

Its simple and easy to use,the screen layout is simpler as well which makes it more friendly to use it in our daily reading.
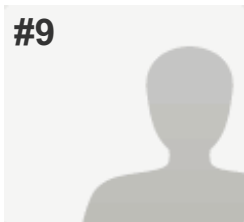

Q9: what did you like least about the website?

From my point of view its quiet good for day to day reading.

Q10: how do you think it could be improved?

Maybe it would be great if there were more topics with some pictures and a Continue reading option in case we need to read the full content.

Q1: **Where do you normally get your news about technology?**

techmeme.com

Q2: **What particular technology areas/topics interest you?**

Google, Android, New Tech, Java,

Q3: **What is your initial impression of our website and in particular the landing page?**

Clean, but some stories appear chopped in their box.
Topics alignment in Topics popup was not justified

Q4: What do you think about the screen layout? In particular how did you find the location of the tweets?   *Respondent skipped this question*

Q5: Do you feel that the news articles were relevent to you? if no they what could be changed?   Topics seemed a bit too broad and limited.More topics to choose from

Q6: **Did you find the tweets under each article interesting or useful?**

I'd move sponsored posts to the right and latest news to the middle.
Try and fit more stories on the page. Could only see two stories.

Q7: Do you feel the website is something you would use in the future? if no then what could be changed?   No as techmeme does this

Q8: **what did you like most about the website?**

I like the clean design

Q9: **what did you like least about the website?**

want to see more stories without scrolling

Q10: how do you think it could be improved?   Add more topics, add more stories on one screen, clean up some html issues stated above (stories being cut, justification on menu)

Q1: Where do you normally get your news about technology?

theregister.co.uk, various other news sites tech pages

Q2: What particular technology areas/topics interest you?

Any science, computer software/security

Q3: What is your initial impression of our website and in particular the landing page?

Nice layout. If you click it would be nice to get full text of article (rather than requiring another 1 or 2 clicks)

Q4: What do you think about the screen layout? In particular how did you find the location of the tweets?

Respondent skipped this question

Q5: Do you feel that the news articles were relevent to you? if no they what could be changed?

Somewhat relevant. What do you mean? I guess needs to add more feeds?

Q6: Did you find the tweets under each article interesting or useful?

Good. Nice big areas.

Q7: Do you feel the website is something you would use in the future? if no then what could be changed?

Not really. No time as it is to keep up with reading from many sources.

Q8: what did you like most about the website?
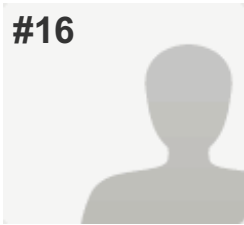

Big clean areas of news. No ads.

Q9: what did you like least about the website?

? Click one time and you don't get more article text. Common problem with many rss feed readers btw.

Q10: how do you think it could be improved?

Click once and get more/full article text

Q1: Where do you normally get your news about technology?

Twitter, Wired, Pop Sci, Science Daily, Discovery Magazine, Techchrunc, Guardian Tech, Reddit

Q2: What particular technology areas/topics interest you?

All

Q3: What is your initial impression of our website and in particular the landing page?

Good but text heavy so interesting info and headlines don;t stand out. More images with great headlines would be draw the eye better.

Q4: What do you think about the screen layout? In particular how did you find the location of the tweets?	*Respondent skipped this question*
Q5: Do you feel that the news articles were relevent to you? if no they what could be changed?	Some were; Would be good to have news type selection option.

Q6: Did you find the tweets under each article interesting or useful?

Decent but again would be better with more imagery.

Q7: Do you feel the website is something you would use in the future? if no then what could be changed?	Yes but only were it to get a re-design to make it easier to browse.

**Q8: what did you like most about the website?**

Content was good

Q9: what did you like least about the website?

Too much text made it hard to skim

Q10: how do you think it could be improved?	Images with great headlines and a list of news types e.g AI, Social Media, Latest News, Trending, Smart, IoT etc

#19

PAGE 1

Q1: Where do you normally get your news about technology?

web: The Register, The Guardian, Irish Times, . . other

Q2: What particular technology areas/topics interest you?

Science, new discoveries, inventions, electronics, robotics, . . .

Q3: What is your initial impression of our website and in particular the landing page?

Clean. Lots of space for content. Ads not in the way.

Q4: What do you think about the screen layout? In particular how did you find the location of the tweets?

Respondent skipped this question

Q5: Do you feel that the news articles were relevent to you? if no they what could be changed?

they were okay. some were relevant/interesting. More science/physics/maths/...

Q6: Did you find the tweets under each article interesting or useful?

very good. big space

Q7: Do you feel the website is something you would use in the future? if no then what could be changed?

Not really ? Maybe. Too many news feeds :-7

Q8: what did you like most about the website?
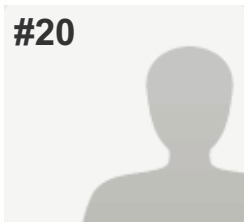

Clean. Simple. Space for news content.

Q9: what did you like least about the website?

When reading something on right, have to click 2wice on something on left to read it.

Q10: how do you think it could be improved?

?More science? More feeds? and unicorns with rainbows.

Q1: Where do you normally get your news about technology?

engadget.com and mashable.com are the favourites list

Q2: What particular technology areas/topics interest you?

Telecom Industry,gadgets

Q3: What is your initial impression of our website and in particular the landing page?

Quiet simple and straight forward to use

Q4: What do you think about the screen layout? In particular how did you find the location of the tweets?

Respondent skipped this question

Q5: Do you feel that the news articles were relevent to you? if no they what could be changed?

Articles were relevant to the chosen topics ,videos would be much attractive and friendly

Q6: Did you find the tweets under each article interesting or useful?

Its good to have the Topics of our Interest listed first on the layout ,Technology Related Jobs section is a good idea.

Q7: Do you feel the website is something you would use in the future? if no then what could be changed?

Will surely bookmark this to the daily news list pages

Q8: what did you like most about the website?

The simplicity of the layouts and the option to look what we are interested in.
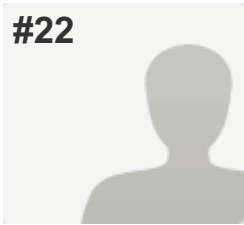

Q9: what did you like least about the website?

When we deselect the chosen topics ,it does not display images and the content is also blank for some of the topics .

Q10: how do you think it could be improved?

Maybe it would be great to give the text "Log Out" when the User points it.

PAGE 1

Q1: Where do you normally get your news about technology?

Q2: What particular technology areas/topics interest you?

general

Q3: What is your initial impression of our website and in particular the landing page?

too much information displayed. better when i personalise it

Q4: What do you think about the screen layout? In particular how did you find the location of the tweets?

Respondent skipped this question

Q5: Do you feel that the news articles were relevent to you? if no they what could be changed?

yes

Q6: Did you find the tweets under each article interesting or useful?

not mad on 3 columns

Q7: Do you feel the website is something you would use in the future? if no then what could be changed?

yes

Q8: what did you like most about the website?
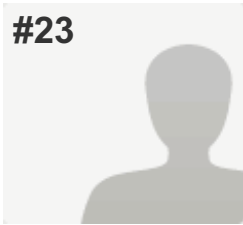

ability to personalise

Q9: what did you like least about the website?

layout

Q10: how do you think it could be improved?

maybe rank personal choices.. i might be interested in iphone, but i would really want to follow what google are doing

PAGE 1

Q1: Where do you normally get your news about technology?

Twitter

Q2: What particular technology areas/topics interest you?

Apple, Google, Programming Languages, Dev Ops, iOS Development

Q3: What is your initial impression of our website and in particular the landing page?

I like the concept, the articles seem relevant. Needs a bit more UI polish.

Q4: What do you think about the screen layout? In particular how did you find the location of the tweets?

Respondent skipped this question

Q5: Do you feel that the news articles were relevent to you? if no they what could be changed?

Yes they seem relevant based on the preferences I picked

Q6: Did you find the tweets under each article interesting or useful?

I'm not crazy about the layout, I'd probably prefer to have tabs rather than columns. The it wasn't obvious what the 'Exit' button did until I clicked it, then it just logged me out. I'd change the icon or prompt the user for confirmation when they press it.

Q7: Do you feel the website is something you would use in the future? if no then what could be changed?

I like the idea, but it's the type of thing I'd tend to read on the go so the mobile version could have a nicer interface

Q8: what did you like most about the website?
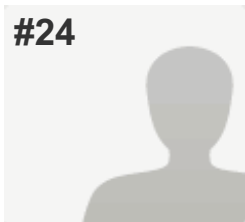

Easy login and relevant information

Q9: what did you like least about the website?

A little unintuitive to use, would be nice to be able to save articles to refer back to later.

Q10: how do you think it could be improved?

Use hi-dpi images and assets like the 'X' button for hi-res mobile displays. Better mobile layout. Get rid of the column layout and use tabs instead.

Q1: Where do you normally get your news about technology?

totaltele
lightreading
theregister
ieee

Q2: What particular technology areas/topics interest you?

Telecoms
Cloud

Q3: What is your initial impression of our website and in particular the landing page?

Not clear what news this is specific to?
1st page mentions "Personalized...", how does that work??

Is it technology

Q4: What do you think about the screen layout? In particular how did you find the location of the tweets?

Respondent skipped this question

Q5: Do you feel that the news articles were relevent to you? if no they what could be changed?

Some were, some weren't. Could be good to categorize

Q6: Did you find the tweets under each article interesting or useful?

needs specific sections/tabs per technology

Q7: Do you feel the website is something you would use in the future? if no then what could be changed?

No, needs more structure, seems to be a random list of items.

**Q8: what did you like most about the website?**

No advertisements!

Q9: what did you like least about the website?

layout

Q10: how do you think it could be improved?   as above

Q1: Where do you normally get your news about technology?

just google

Q2: What particular technology areas/topics interest you?

any really

Q3: What is your initial impression of our website and in particular the landing page?

nice

Q4: What do you think about the screen layout? In particular how did you find the location of the tweets?

Respondent skipped this question

Q5: Do you feel that the news articles were relevent to you? if no they what could be changed?

relevant

Q6: Did you find the tweets under each article interesting or useful?

Good layout, slide out panel is nice- a lot of information at once but that's the point i suppose!

Q7: Do you feel the website is something you would use in the future? if no then what could be changed?

i would use it

Q8: what did you like most about the website?
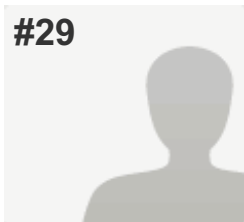

slide out panel

Q9: what did you like least about the website?

when you switch to mobile, you seem to lose latest content and adverts

Q10: how do you think it could be improved?

A lot of text, maybe break it up with images or put some content in slideout panels (just opinion:))

PAGE 1

Q1: Where do you normally get your news about technology?

Twitter, journal.ie, sky news and facebook

Q2: What particular technology areas/topics interest you?

Technologies that I use, apple, smart devices,smart homes

Q3: What is your initial impression of our website and in particular the landing page?

Landing page is very impressive and the link with twitter is very handy.

Q4: What do you think about the screen layout? In particular how did you find the location of the tweets?

Respondent skipped this question

Q5: Do you feel that the news articles were relevent to you? if no they what could be changed?

yes they focused on technologies I like but it might have been better to have less your news on the page and as I scroll down it loads more maybe.

Q6: Did you find the tweets under each article interesting or useful?

a lot of blank space in the two grey columns when you start to scroll down. Might have been better to fit those grey panels to the window height and have the scrolling on the your news section only. There is a lot of white space below news stories that is empty and could be removed.

Q7: Do you feel the website is something you would use in the future? if no then what could be changed?

If the website had TAGs on each story to give me a rough idea of what the story was about maybe and if less emphasis was focused on Ads. The right column should really be half the size

Q8: what did you like most about the website?

The convenience of being able to log in and view stories
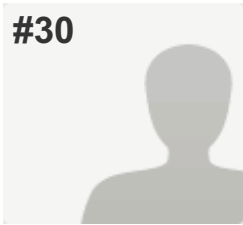

Q9: what did you like least about the website?

The huge amount of empty space and the fairly plain look to it. Could use some changes to the layout and how the latest news is displayed.

Q10: how do you think it could be improved?

explained in other points

PAGE 1

Q1: Where do you normally get your news about technology?

either by googling or through account managers from vendors I work with

Q2: What particular technology areas/topics interest you?

wide range - microsoft, virtualisation, unix, mainframes, storage, citrix

Q3: What is your initial impression of our website and in particular the landing page?

Like it alot

Q4: What do you think about the screen layout? In particular how did you find the location of the tweets?

Respondent skipped this question

Q5: Do you feel that the news articles were relevent to you? if no they what could be changed?

yes

Q6: Did you find the tweets under each article interesting or useful?

works for me - nice and easy to read

Q7: Do you feel the website is something you would use in the future? if no then what could be changed?

possibly

Q8: what did you like most about the website?

ability to chose what I want to focus on

Q9: what did you like least about the website?

scrolling... there are two scrollbars and I kind of lost my way at one stage - nothing major though

Q10: how do you think it could be improved?

maybe make the settings thing more obvious - I knew it was there cause I saw your demo but nothing on website indicates that you can make choices.

Q1: **Where do you normally get your news about technology?**

pcmag.com

Q2: **What particular technology areas/topics interest you?**

Open source software, mobile technology

Q3: **What is your initial impression of our website and in particular the landing page?**

landing page is fine quite difficult to see the skip button which may be intentional

Q4: **What do you think about the screen layout? In particular how did you find the location of the tweets?**

little cluttered for my liking.

Q5: **Do you feel that the news articles were relevent to you? if no they what could be changed?** | articles covered broad range of topics so that was good

Q6: **Did you find the tweets under each article interesting or useful?**

depending on someones preferences, personally i'm not a tweeter so no

Q7: **Do you feel the website is something you would use in the future? if no then what could be changed?** | yes it's a good site i would check in regularly
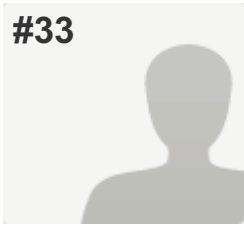

Q8: **what did you like most about the website?**

content

Q9: **what did you like least about the website?**

layout

Q10: **how do you think it could be improved?** | less cluttered, more structured, more symmetry in design

PAGE 1

Q1: Where do you normally get your news about technology?

bbc / guardian

Q2: What particular technology areas/topics interest you?

nanotech,

Q3: What is your initial impression of our website and in particular the landing page?

a lot going on, in large fonts. but very good!

Q4: What do you think about the screen layout? In particular how did you find the location of the tweets?

i found the addition of the tweets a little bit cluttering. But then again i'm not a big twitter person so maybe it'd b more of a distraction.

Q5: Do you feel that the news articles were relevent to you? if no they what could be changed?

yes, thought they were more varied than the last time i looked

Q6: Did you find the tweets under each article interesting or useful?

see above comment

Q7: Do you feel the website is something you would use in the future? if no then what could be changed?

yes

**Q8: what did you like most about the website?**

that its pure tech stuff

Q9: what did you like least about the website?

a little bit cluttered or maybe i found the font a bit big

Q10: how do you think it could be improved?

Respondent skipped this question

PAGE 1

Q1: **Where do you normally get your news about technology?**

engadget.com
9to5google.com
omgchrome.com
windowscentral.com

Q2: **What particular technology areas/topics interest you?**

Smartphones (Not like main brands like Samsung etc.) More like flagship phones at affordable prices like
OnePlus or Xiaomi. some unknowns

Q3: **What is your initial impression of our website and in particular the landing page?**

First off the grid seems to be fine. I'd really consider changing the background image. i know its news so it
links with newpapers etc, but i definitly wouldnt use that image. the CTA, logo, and name and buttons need
to be moved up and also slightly smaller. and sort out those buttons! the "skip sign-in" should NOT be a big
button, it should be a link. change the colour of the font of the second button.

Q4: **What do you think about the screen layout? In particular how did you find the location of the
tweets?**

After sign in/skip sign in the grid is gone. Too much text on the screen. Merge the Latest News and adverts
into 1 column, Latest news on top of adverts. screen should look like this: WS|STORYS.LN|WS ..
whitespace,storys,latest news column, more whitespace. On clicking a story, the left side is greyed out,
however it stills scrolls down. This means you want the user to focus on the story (fair enough), but its only
half the screen? Change the greyed out bit, back to normal, and let them continue to have stories they can
scroll through on the left.

Q5: **Do you feel that the news articles were
relevent to you? if no they what could be changed?**

yes, after sign in

Q6: **Did you find the tweets under each article interesting or useful?**

No. For example the apocolyptic short film story showed the verge tweets underneath which were referring
to E-sports drug bans.

Q7: **Do you feel the website is something you
would use in the future? if no then what could be
changed?**

yes with changes mentioned. i simply wouldnt use
the site if that twitter feed was there. necessary
clutter.

**Q8:** **what did you like most about the website?**

Its fast

Q9: **what did you like least about the website?**

GET RID OF THE TWITTER FEED. It's literally a way of getting people to leave your site. (also hurts users on mobile data). A compromise is just to have something like this underneath the article, "Follow Wired on twitter: Follow" .. users can simply click the follow button.. Remember this, if users want to read tweets, they will go to twitter.

Q10: **how do you think it could be improved?**

in summary, whitespace on the left and right for ease on eyes, condense the 2 columns into 1, get rid of twitter feed, move the CTA (call to action) on the homepage up! if possible after clicking a story, display a larger version of the image. I'm a multimedia programming and design student and these are DEFINITE changes you need to make. if i think of anything else, ill do another survey.

PAGE 1

Q1: Where do you normally get your news about technology?

Online versions of UK news sites (BBC) and broadsheets (Guardian)

Q2: What particular technology areas/topics interest you?

Mobile telephony, mobile internet, innovative mobile applications, Internet-Of-Things (IOT)

Q3: What is your initial impression of our website and in particular the landing page?

Very neat on mobile (HTC Android), screen transitions are a bit stuttered/choppy , easy to navigate, very readable and useable.

Q4: What do you think about the screen layout? In particular how did you find the location of the tweets?

Screen layout is very spreadout on desktop monitor, but sections are easily identifiable, division is clear. Not a 'power-user' of twitter, rarely use it. Tweet location is intuitive and I would say in the right place, I would be unlikely to click-through more than 2 or 3 articles. Are the tweets ordered in some way ? Time ? Priority ? Popularity ?

Q5: Do you feel that the news articles were relevent to you? if no they what could be changed?

Yes, both relevant and interesting. Thanks newsfast !

Q6: Did you find the tweets under each article interesting or useful?

Mostly interesting and useful, yes.

Q7: Do you feel the website is something you would use in the future? if no then what could be changed?

If the filtering of news articles based on user preference is accurate then I would definitely continue to use the site.

Q8: what did you like most about the website?

Very easy to read and use on mobile device.

Q9: what did you like least about the website?

The site as viewed via Chrome browser on desktop monitor looks a little clunky, but still clear. Not sure if a dedicated 'Adverts' section is something people will pay attention to.

Q10: **how do you think it could be improved?**

Might be useful to timestamp the articles in some way, either with a publication date (absolute time), or an indicator of how old the article is (relative time, i.e. 3 hours ago, etc)

#37

PAGE 1

Q1: Where do you normally get your news about technology?

Reddit.com, infoq.com

Q2: What particular technology areas/topics interest you?

Development, Gadgets

Q3: What is your initial impression of our website and in particular the landing page?

Very well done, and highly interactive

Q4: What do you think about the screen layout? In particular how did you find the location of the tweets?

I think they were well positioned, and very readable.

Q5: Do you feel that the news articles were relevent to you? if no they what could be changed?

They weren't much, because they don't talk specifically about development; you could add new news sources to it.

Q6: Did you find the tweets under each article interesting or useful?

Yes

Q7: Do you feel the website is something you would use in the future? if no then what could be changed?

Yes, if you were to add more news sources.

Q8: what did you like most about the website?
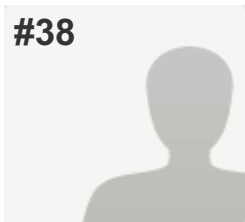

The layout and ease of use.

Q9: what did you like least about the website?

Not too much content (yet).

Q10: how do you think it could be improved?

Adding possible ways were people could interact with others (in a way similar to reddit) and discuss certain topics.

PAGE 1

Q1: Where do you normally get your news about technology?

Reddit, bbc news, podcasts

Q2: What particular technology areas/topics interest you?

Limb replacements, disease treatments and vaccinations, robots, AI, super computers, space travel tech, electric cars, anything around renewable energy

Q3: What is your initial impression of our website and in particular the landing page?

Good, good layout very easy to browse, could not sign up as no twitter, once i reached the bottom of the page I was done.

Q4: What do you think about the screen layout? In particular how did you find the location of the tweets?

Good, layout is probably the best thing about the site

Q5: Do you feel that the news articles were relevent to you? if no they what could be changed?
They were interesting, but I was given default as I didn't sign in

Q6: Did you find the tweets under each article interesting or useful?

Seemed relevant but the article is usually the most interesting part

Q7: Do you feel the website is something you would use in the future? if no then what could be changed?
If I could sign in with gmail and it was able to display things I found interesting, for sure, but I didn't use that side.

Q8: what did you like most about the website?
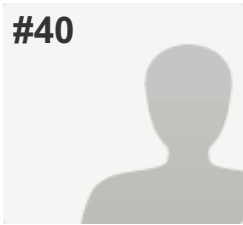

The layout

Q9: what did you like least about the website?

I couldn't avail of the content tailoring which is probably the best feature. As a not signed in user I could only see a small amount of content, and almost everyone will probably try this for the first time as a non signed in user, so I would do something there.

Q10: how do you think it could be improved?
Answer in Q 9.

PAGE 1

Q1: Where do you normally get your news about technology?

Aggregate sites

Q2: What particular technology areas/topics interest you?

Space travel, autonomous technology, renewables

Q3: What is your initial impression of our website and in particular the landing page?

Busy but not overloaded, intuitive

Q4: What do you think about the screen layout? In particular how did you find the location of the tweets?

Don't have twitter, can't comment

Q5: Do you feel that the news articles were relevent to you? if no they what could be changed?

Broadly relevant

Q6: Did you find the tweets under each article interesting or useful?

Yes

Q7: Do you feel the website is something you would use in the future? if no then what could be changed?

Ostensibly

**Q8: what did you like most about the website?**

low load time

Q9: what did you like least about the website?

Reminds me of Gawker media sites with layout

Q10: how do you think it could be improved?

More negative space

PAGE 1

Q1: **Where do you normally get your news about technology?**

RSS feeds from many sites
Redit
Twitter (both following and re-tweets)
chat room links

Q2: **What particular technology areas/topics interest you?**

science, it, games etc.

Q3: **What is your initial impression of our website and in particular the landing page?**

"fuck signing in with twitter" -_- "what's that down there?"
seriously, that black text is near impossible to read, and you broke normality with, links change colour when you hover over them!

Why not make it less jaring when you click that 'what is this shite' by scrolling

Q4: **What do you think about the screen layout? In particular how did you find the location of the tweets?**

It's really not clear where the tweets are.
column widths look to be well balanced.
Bars floating at the top of pages and not scrolling out of the way are a serious PITA.
Twitter button is positioned 'wrong', should float to the top of the bar to be less annoying looking (think internet OCD)
The grey highlight for items in 'your news' need some padding at the bottom, the text is currently sat right on the bottom of that grey box, it's annoying
When narrowing the width of the screen, you loose one of the columns, the twitter button also decides to be left aligned for some reason.

Q5: **Do you feel that the news articles were relevent to you? if no they what could be changed?**

didn't signin, so can't comment

Q6: **Did you find the tweets under each article interesting or useful?**

didn't signin, so can't comment

Q7: **Do you feel the website is something you would use in the future? if no then what could be changed?**

didn't signin, so can't comment

Q8: **what did you like most about the website?**

Looks relatively well focused on what it does
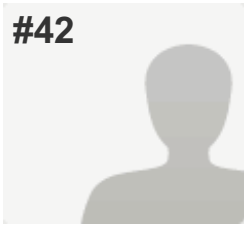

Q9: **what did you like least about the website?**

Nothing major to say really, I just don't think it's something I'd use myself

Q10: **how do you think it could be improved?**   lots of little paper cuts :P

Q1: Where do you normally get your news about technology?

google

Q2: What particular technology areas/topics interest you?

Android, Apps,

Q3: What is your initial impression of our website and in particular the landing page?

Good start page, Easy to read information. Straightforward and Clear

Q4: What do you think about the screen layout? In particular how did you find the location of the tweets?

All the information is easily accessible so its functionally very useful. I feel it could be improved to make it a bit more eye catching. Adverts and latest news seem tied together.

Q5: Do you feel that the news articles were relevent to you? if no they what could be changed?

Yes. they could also be enhanced through more detailed filtering.

Q6: Did you find the tweets under each article interesting or useful?

I think it adds to the stories.

Q7: Do you feel the website is something you would use in the future? if no then what could be changed?

If it were expanded to more topics, and possible filter by region it could be something I would look at regularly.

Q8: what did you like most about the website?
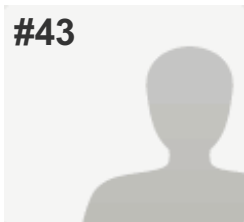

Ease to filter each topic.

Q9: what did you like least about the website?

Lack of pics, some stories pulled in pics but a lot didn't.

Q10: how do you think it could be improved?

Pictures are great to visually improve websites (If you could pull in a pic from the story). Custom icons could be associated with each story to show its relevance (I.e. a android symbol beside all stories relating to android filter)
